

## PRESS RELEASE

### **Business Aviation Centre Cologne certified**

**Cologne/Bonn Airport, 16. October 2014 – The Business Aviation Centre Cologne (BACC) is now ISO 90001:2088 certified in the fields of operations and handling. The handling agent and owner of the General Aviation Terminal has implemented a quality management system and underwent an external examination through an independent auditing team.**

The high service quality of all services of the Business Aviation Centre Cologne has now passed an independent audit and got certified this month.

„This certification is proof that we do not only speak about extremely high quality standards but actually live them“, says Chief Operating Officer Dirk Laufenberg. „Our management system fulfills all requirements and we now have this confirmed in writing. I'm very excited about that.“

Daily processes and documentations were examined during the audit as well as the implementation of the company policy. Handling special events and taking actions for steady improvement of proceedings were also audited.

The Business Aviation Centre Cologne GmbH is the operator of the General Aviation Terminal at Cologne/Bonn International Airport and a wholly-owned subsidiary company of Kurz Aviation Service Stuttgart GmbH. In addition, BACC offers complete ground handling services at Cologne Airport and will arrange handling services throughout Germany.
